- Time Management

PERSONAL STATEMENT

Highly motivated development professional with board experience in software development with 2+ years of experience developing and integrating front-end applications. Extensive work experience in the complete software development life cycle (SDLC), including business interaction, requirement analysis, software architecture, design, development, testing, and documentation. The creation of a set of standard modules helps to minimize coding time and effort. My main objective is to provide supreme quality of service with a minimum amount of time.

PROFESSIONAL SKILLS

- Passionate Front-end engineer with 2+ years of hands-on experience in developing scalable web applications using a wide range of front- skills like HTML, CSS, JavaScript, TypeScript ReactJS, etc.
- Export of coding, debugging and unit testing
- Upgrade and maintain front-end systems.
- Export scalable web-based user interface and components using React.

PROFESSIONAL WORK EXPERIENCE

A. React Developer May - 2023 to Present

Project Name: JERA

Description: Working on JERA, the largest power generation company in Japan, supplying approximately 30% of the country's electricity.

Responsible for developing new features, refactoring code, and maintaining responsive, reusable components while ensuring scalability and code quality.

Applications: TOT, WOT, OOT, HSSC

Role: Front-end Developer – Enhancing front-end architecture with React and modern technologies.

Tech Stack: TypeScript | ReactJS | Jest | Styled Components

B. Software Developer Intern July 2022 - Mar 2023

Product: Carbon Planner - Royal Bank of Scotland

Contributed to the development of a carbon footprint management platform used by Fortune 500 companies like Microsoft. Worked in a Scrum team to enhance the frontend architecture and improve platform scalability.

Key Contributions:

- Developed and optimized three React modules to enhance platform functionality.
- Conducted unit testing with Jest, achieving 90% test coverage for reliability.

Tech Stack:

ReactJS | Jest | Material UI | Jira
